

TRIBUTE TO THE CITY OF
ROSSFORD AND THE AUTHORS
OF "AS I RECALL"

HON. MARCY KAPTUR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 18, 1999

Ms. KAPTUR. Mr. Speaker, Henry James once said, "it takes a great deal of history to produce a little literature." Today I rise in tribute to the extraordinary people of Rossford, Ohio, who have recorded the first hundred years of history of their community in a book entitled, "As I Recall."

Mr. Speaker, a community is made up of neighbors who care, whose spirit makes the community what it is. This book, four years in the making and written by more than twenty members of the community, tells the stories of these neighbors, their triumphs and tragedies. It is their history that made Rossford the place it is today. And, as we see how life has changed since then, it's also a comfort to know that some things just don't change in Rossford—it's still a community where neighbors help neighbors and where people try to live up to the legacies of those who came before them.

The authors of this labor of love include: Josephine Ignasiak; Milo Louis Bihn; Stanley Brown; Mary Lou Hohl Caligiuri; Virginia Craine; Arnold Frautschi; Estelle Heban; Virginia (Grod) Heban; Arlene Hustwick; Lucille H. Keeton; Lee Knorek; Frank Kralik; Frank Newsom; Eleanor Nye (Mary Kralik).

Also Valeria Ochendusko; Gabriel Palka; Sister Janice Peer; Rosalie and Steve Peer; Sally Plicinski; Jim Richards; Maureen Richards; Ben Schultz; Stan Schultz; Judy Sikorski; Pat Sloan; Charlotte R. Starnes; Audrey Stolar; Dr. Don Thomas; the Tisdale Family; Ed Tucholski; Irene Verbosky; Kim Werner; and Marjorie Wilbarger.

For me this book is very special as our father and mother operated a family grocery in Rossford when my brother Steve and I were growing up. We were flattered to be asked to include our recollections of Rossford.

Mr. Speaker, may we congratulate Rossford reaching this milestone and be inspired by the people who gave so much of themselves so that our history would forever be preserved.

HONORING UAW LOCAL 599
REUTHER AWARD RECIPIENTS

HON. DALE E. KILDEE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 18, 1999

Mr. KILDEE. Mr. Speaker, it is my great pleasure to pay tribute to 25 members of UAW Local 599, who will be recipients of the Walter P. Reuther Distinguished Service Award. On Saturday, November 6, 1999, these individuals were honored at the 19th Annual Walter and May Reuther Twenty Year Award Banquet.

Local 599 has always had a special place in my heart because my father was one of its original members. Over the years, Local 599 has developed a strong and proud tradition of supporting the rights of working people in our community, and improving the quality of life for its membership. This year marked the 60th

anniversary of the local's charter, and its commitment to working for decent wages, education and training, and civil and human rights.

Mr. Speaker, it is indeed an honor to recognize these special individuals who have diligently served their union and community. During this time, each one of these UAW members has held various elected positions in the union. And there is no question they have represented their brothers and sisters well.

It is very fitting that these 25 people be recipients of the Walter P. Reuther Distinguished Service Award. Walter Reuther was a man who believed in helping working people, and he believed in human dignity and social justice for all Americans. The recipients of this award have committed themselves to the ideals and principles of Walter Reuther. They are outstanding men and women who come from every part of our community, and they share the common bond of unwavering commitment and service.

Mr. Speaker, I would ask my colleagues in the House of Representatives to join me in honoring Robert Aidif, David Aiken, Dale Bingley, Dennis Carl, Jessie Collins, Russell W. Cook, Harvey DeGroot, Patrick Dolan, Larry Farlin, Maurice Felling, Ted Henderson, James Yaklin, Ken Mead, Don Wilson, Frank Molina, Shirley Prater, Gene Ridley, John D. Rogers, Dale Scanlon, G. Jean Garza-Smith, Robbie Stevens, Nick Vuckovich, Jerry J. Ward, Greg Wheeler, and Tom Worden. I want to congratulate these fine people for all of the work they have done to make our community a better place to live.

HUMANITARIAN WORK'S HEAVY
TOLL

HON. TONY P. HALL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 18, 1999

Mr. HALL of Ohio. Mr. Speaker, I rise today in memory and in honor of 24 people who lost their lives last week trying to help those who are suffering in Kosovo.

These aid workers and others were on a flight between Rome and Pristina. Wreckage of their plane was found only a few miles from their destination. They were United Nations employees and aid workers serving private charities, police officers taking time off their regular jobs to help bring peace to Kosovo, doctors and scientists, and the crew that flew the route regularly for the World Food Programme.

Mr. Speaker, we have discussed on this floor what the onset of winter will mean for refugees who returned to their homes in Kosovo to find only rubble. We have worried over their fate and tried to provide funding for people who would act on our shared concerns—people like those who died Friday.

In a region riven by bitter clashes between ethnic groups, the ethnic background of those who have come to their aid is remarkable for its variety. Those who died personify this coming together for the sole purpose of easing suffering: 12 Italians, three Spaniards, two Britons, an Irishman, a Kenyan, a Bangladeshi, an Australian, a Canadian, an Iraqi, and a German.

Theirs are the faces of the United Nations, faces that signify hope to millions of people

around the world. We sometimes forget that the U.N. has a very human face—and a remarkable number of dedicated employees. The World Food Programme, which provides food aid to 75 million people in 80 countries, is just one example of the United Nations at work. Since 1988, this organization has lost 51 employees to work-related accidents, illnesses, and attacks—including three who died last week. They died fighting the hunger that gnaws away the lives of one of every seven people in the world, assisting in projects that too often exacted the heaviest human cost.

Mr. Speaker, as we look forward to our Thanksgiving meals next week, let us pause a moment to reflect on those who died last week trying to eradicate starvation—much as our dear friend and colleague, Congressman Mickey Leland, did 10 years ago.

Together with Mickey, we remember Roberto Bazzoni, Paola Biocca, Andrea Curry, Velmore Davoli, Nicolas Ian Phillip Evens, Abdulla Faisal, Marco Gavino, Kevin Lay, Raffaella Liuzzi, Miguel Martinez-Vasquez, Jose Maria Martinez, Alam Mirshahidul, J. Perez Fortes, Richard Walker Powell, Daniel Rowan, Thabit Samer, Paola Sarro, Laura Scotti, Antonio Sircana, Carlo Zechhi, Julia Ziegler, Andrea Maccaferro, Antonio Canzolino, and Katia Piazza.

They all were heroes to the hungry and suffering people of the world, and they all deserve our thanks and our prayers for the families they left too soon.

CELEBRATING THE OPENING OF
THE STOWERS INSTITUTE FOR
MEDICAL RESEARCH IN KANSAS
CITY, MISSOURI

HON. KAREN MCCARTHY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 18, 1999

Ms. MCCARTHY of Missouri. Mr. Speaker, I rise today to honor Jim and Virginia Stowers on the launch of the Stowers Institute for Medical Research located in my district in Kansas City, MO. Their generous support of biotech research will profoundly impact upon the lives of those who suffer from cancer, and benefit the friends and family members of those who battle the disease. On this occasion, I salute the Stowers for their selfless contributions to the field of science in establishing their institute to bring "Hope for Life."

To our community, Jim and Virginia Stowers are local heroes. To those who will one day benefit from their charity, they will no doubt be referred to as saints. Their remarkable story is triumphant and inspirational. In 1958, Jim Stowers founded Twentieth Century Investors and created what would later be known as the American Century Companies. Today, Mr. Stowers heads the company as chairman of a successful multi-billion dollar firm investing in mutual funds across the nation. His wife, Virginia, worked as a nurse to support her growing family and her husband's dream. She shared her husband's vision and confidence by working to help her family and those most in need in her nurturing professions as nurse, wife, and mother.

Their commitment to cancer research is derived from their own hardships and personal survival experiences. Mr. Stowers was diagnosed in 1986 with prostate cancer. Mrs.

Stowers fought breast cancer in 1993 followed by years of treatment, and their daughter, Kathleen's current encounter with cancer was the impetus for the creation of the Stowers Institute for Medical Research. Jim Stowers serves as president with Virginia serving as vice president over every aspect of their legacy to scientific research.

The Stowers Institute is attracting the most highly sought researchers in biology, technology, and engineering who want to join in this exciting and worthy venture. World renowned experts from the University of Washington, the California Institute of Technology, the University of California, Berkeley, the McLaughlin Institute, and the University of Missouri-Kansas City are exploring the make-up of our DNA and analyzing the forthcoming information in a facility where research into life systems will produce a better understanding of the nature of cancer. Scientists and doctors would then be able to use this research in developing treatments, medicine, and ultimately, a cure.

Our community has watched the construction of this facility which is anticipated to be in complete operation next year. It rescues from urban blight the site of the former Menorah Hospital near universities and cultural centers. The Stowers endowed to the Institute a gift of \$336 million to fund the ongoing research of scientists so they can dedicate their valuable time to science instead of raising money for their work. Investment of the multi-billion dollar assets in mutual funds, contributions by other donors, and the gift of the estate of Virginia and Jim Stowers is expected to reach \$30 billion or more in the next millennium, which will secure financial support for the Institute.

Mr. Speaker, please join me in thanking Virginia and Jim Stowers for their tremendous gift, which assures their ongoing mission for "Hope for Life." I look forward to the successes of the Stowers Institute for Medical Research and share the same hope they have inspired.

HIGH-QUALITY CHILD CARE CAN HELP PARENTS MOVE TOWARD SELF-SUFFICIENCY

HON. FORTNEY PETE STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 18, 1999

Mr. STARK. Mr. Speaker, I rise to address the issue of quality improvements in our nation's child care centers. As a member of the House Ways and Means Subcommittee on Human Resources with jurisdiction over the federal welfare system, I voted against the 1996 overhaul of our welfare system because of the dangerous effect it would have on the health and well-being of children and families in our country.

Congress was warned by advocates for low-income and poor families that without the proper work supports—health care, food assistance, and child care services—welfare reform's efforts to push mothers into low-paying, low-skill jobs could not succeed. Now as more and more families with children are forced to send both parents (or the only parent) to work, the absence of child care hampers the ability of mothers to successfully make that move.

Families are stuck between a rock and a hard place. Child care is in short supply, is too

expensive for many families to afford, and often is of poor quality. When families try to get child care, they encounter long waiting lists—even for crummy programs—or the care available is unaffordable. The message to low-income families is that they must take any care they can get. More often than not, parents end up patching together a number of child care arrangements and go through the day anxious that part of the child care chain will fail. Many mothers are reporting that the child care assigned to them by welfare case-workers would place their children in a low-quality setting that would make them susceptible to physical harm and do little to prepare children for school.

Working parents need to feel secure about the arrangements they've made for their children during work hours, because the quality of care children receive can make a difference in parents' ability to work. Evaluations of GAIN, the job-training program for welfare recipients in California, found that mothers on welfare who were worried about the safety of their children and who did not trust their providers were twice as likely to subsequently drop out of the job-training program.

We must increase both the quantity and the quality of the care offered. My bill, the Child Care Quality Improvement Act (H.R. 2175), promotes quality child care by providing incentive grants to states to help them set and meet long-term child care quality goals. My bill would base a state's eligibility for future funding on the progress made in increasing training for staff, enhancing licensing standards, reducing the number of unlicensed facilities, increasing monitoring and enforcement, reducing caregiver turnover, and promoting higher levels of accreditation.

Congress has wrongly refused to require significant quality standards for the billions in child care dollars we allocate each year. The federal government should give states the resources to improve child care quality at the local level, but only through a system of measurable indicators of desired outcomes.

As the father of a young son, I know the difficulty families face when searching for a caregiver for their children. I believe we must give families peace of mind by helping states provide the high quality of care every child deserves. We must not threaten a parent's chance at succeeding on the job and achieving self-sufficiency.

OFFERING BODY PARTS FOR SALE

HON. CHRISTOPHER H. SMITH

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 18, 1999

Mr. SMITH of New Jersey. Mr. Speaker, I would like to commend to the attention of my colleagues this disturbing article by Mona Charen, which appeared in the November 11, 1999 edition of the Washington Times. As the article itself states, "This is not a bad joke. Nor is it the hysterical propaganda of an interest group." It is comprised of the personal recollections of a medical technician who worked for a medical firm engaged in selling the body parts of the victims of late-term abortions. In her most chilling descriptions, she relates the means by which children born alive are killed, so that their bodies may be sold for

profit. On this life and death issue, I urge my colleagues to consider this woman's words for themselves:

[From the Washington Times, Nov. 11, 1999]

OFFERING BODY PARTS FOR SALE

(By Mona Charen)

"Kelly" (a pseudonym) was a medical technician working for a firm that trafficked in baby body parts. This is not a bad joke. Nor is it the hysterical propaganda of an interest group. It was reported in the American Enterprise magazine—the intelligent, thought-provoking and utterly trustworthy publication of the American Enterprise Institute.

The firm Kelly worked for collected fetuses from clinics that performed late-term abortions. She would dissect the aborted fetuses in order to obtain "high-quality" parts for sale. They were interested in blood, eyes, livers, brains and thymuses, among other things.

"What we did was to have a contract with an abortion clinic that would allow us to go there on certain days. We would get a generated list each day to tell us what tissue researchers, pharmaceutical companies and universities were looking for. Then we would examine the patient charts. We only wanted the most perfect specimens." That didn't turn out to be difficult. Of the hundreds of late-term fetuses Kelly saw on a weekly basis, only about 2 percent had abnormalities. About 30 to 40 babies per week were around 30 weeks old—well past the point of viability.

Is this legal? Federal law makes it illegal to buy and sell human body parts. But there are loopholes in the law. Here's how one body parts company—Opening Lines Inc.—disguised the trade in a brochure for abortionists: "Turn your patient's decision into something wonderful."

For its buyers, Opening Lines offers "the highest quality, most affordable, freshest tissue prepared to your specifications and delivered in the quantities you need, when you need it." Eyes and ears go for \$75, and brains for \$999. An "intact trunk" fetches \$500, a whole liver \$150. To evade the law's prohibition, body-parts dealers like Opening Lines offer to lease space in the abortion clinic to "perform the harvesting," as well as to "offset [the] clinic's overhead." Opening Lines further boasted, "Our daily average case volume exceeds 1,500 and we serve clinics across the United States."

Kelly kept at her grisly task until something made her reconsider. One day, "a set of twins at 24 weeks gestation was brought to us in a pan. They were both alive. The doctor came back and said, 'Got you some good specimens—twins.' I looked at him and said: 'There's something wrong here. They are moving. I can't do this. This is not in my contract.' I told him I would not be part of taking their lives. So he took a bottle of sterile water and poured it in the pan until the fluid came up over the mouths and noses, letting them drown. I left the room because I could not watch this."

But she did go back and dissect them later. The twins were only the beginning. "It happened again and again. At 16 weeks, all the way up to sometimes even 30 weeks, we had live births come back to us. Then the doctor would either break the neck take a pair of tongs and beat the fetus until it was dead."

American Enterprise asked Kelly if abortion procedures were ever altered to provide specific body parts. "Yes. Before the procedures they would want to see the list of what we wanted to procure. The [abortionist] would get us the most complete, intact specimens that he could. They would be delivered to us completely intact. Sometimes the fetus appeared to be dead, but when we
